October 27, 1970

Subject : Use of Room E-1

To: President, Society of Model Engineers
President, WSOE Radio

Permission has been granted for your organizations to use the room E-1 located in the basement of the "E" Building.

This permission has been granted after approval by President Karl Werwath and Vice-president Heinz Werwath. However, President Werwath has recommended this approval be given for the remainder of the school year only. Consequently, near the end of the summer quarter, 1971, your organizations will be required to resubmit a request for extension of the use of this facility.

It is understood that your organizations will be responsible for the police and care of this facility. While your interest is to use the room as a work area, it is recommended that you keep some semblance of order since the area is open to public view.

Robert R. Rice
Dean of Students
